

121Sentry

Wireless Personal Emergency Call System

To summon assistance in lone interview situations. Helping you to meet your employer Health and Safety obligations for your staff.

Installed in Minutes

**Fully expandable to
Up to 99 Users**

Up to 80m Range

**Audible Warning &
LED Display**

No Ongoing Contracts

No Licence Needed

Mains Powered Central Unit

**Battery operated Personal or
Wall Mounted button options**

**Lanyard
Fitting Options**

To use, just press the red button on the top of the battery operated key fob.

A red light will show while the internal transmitter silently calls the mains powered display unit with its identity code up to 80 metres away, depending on local topography.

When the transmitted code is received, the identity number is displayed on the front panel, with the sounder operating until reset.

If another transmitter is activated before resetting the display unit, the illuminated digit will change to the new code received.

The beauty of this system is its simplicity of installation, and use. It is very discreet, and will help ensure that your staff feel secure when dealing with clients on a one to one basis, who may not be giving them the courtesy they deserve.

This system is fully portable, so can be moved at no cost, should you change premises.

All the equipment conforms to the UK licensing requirements & CE regulations.
