

swimSentry

Wireless Poolside Emergency Call System

To summon assistance in emergency situations. Optional audible siren built in, and messages sent to dedicated pagers throughout building.

Fully Waterproof

Battery Operated

Licence Exempt

Up to 250 metre Range

Text Message Identity

**Unlimited 'Pagers' with
'Vibrate & Bleep' and Display**

No Ongoing Contracts

Expandable System

No Wiring Required

This system will give you and your clients the confidence to use your pool and leisure facilities knowing help can be quickly on hand, if required, for any reason.

When the button is pushed it activates both the external siren and the internal transmitter.

The Button will remain depressed and the siren will sound, until a key is used to release the button, alerting those in the location of a problem.

Simultaneously the transmitter sends a pre-set code or message to the pocket "pager" up to 250 metres away, subject to local topography.

The "pager" will respond by beeping or vibrating, alerting you that the pool alarm has been activated while displaying the identity number or location of the alarm unit activated.

You can have numerous dedicated "pagers" to react to the same alert, so many people can respond to a signal. Additional equipment such as passive infrared motion detectors, (PIRs), can be added to the system at a later date to expand on the safety and security of your site.

All equipment conforms to the UK licensing requirements & CE approvals.
